Participation. Inclusion. Self-determination.

The Bundesverband Konduktive Förderung nach Petö e.V. is an umbrella organisation and an initiative of parents, institutions and organisations for people with inherent or acquired physical and multiple disabilities.

We have made it our task, to install and access the Petö-Method according to Prof. Dr. András Petö, in its unique complexity, as a holistic and daily live orientated conductive pedagogy and rehabilitation, in Germany for people with and without disability.

Support through politics

Our Patron

Daniela Ludwig, member of parliament, supports our goals on a political level.

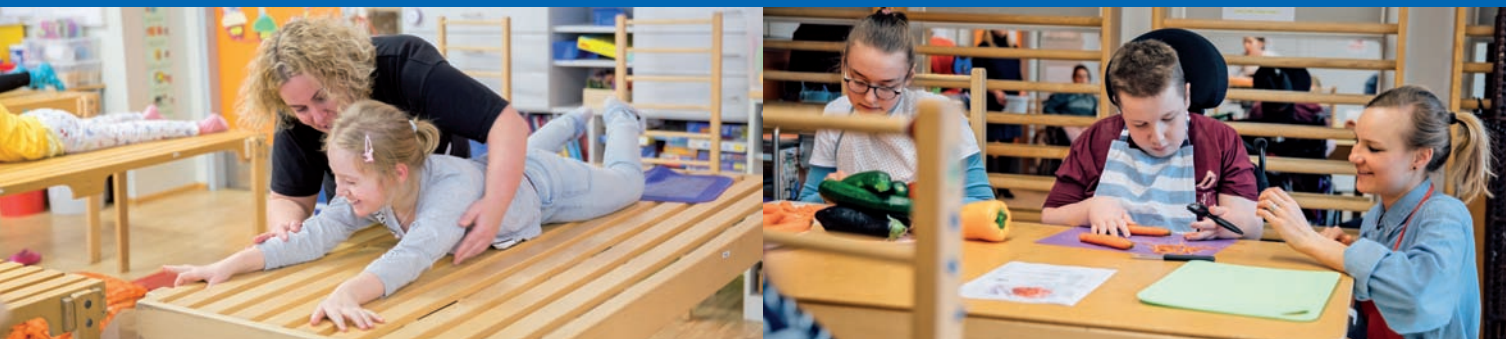

Success for people with disability

Since the foundation our projects and support have enabled effected people to lead a self-determined life in the best way possible.

Conductive centers and workplaces were established, awareness and acceptance achieved, friendships made. Fun in live gained!

The pedagogical Petö-concept

The pedagogical Petö-concept is being developed further in kindergarten, schools and inclusive institutions. Also children without disability profit from it.

Advantages for you

Profit from
